Sterilization Basket System

Sterilization Basket System

The optimum solution

The universal Sterilization Basket System from Richard Wolf provides safe and gentle accommodation for the valuable instrument set during sterilization, transport, and storage.

The universal basket concept allows virtually any basket configuration to be put together.

Top-heavy instruments are securely fixed with an open and a closed silicone holder.

The patented double frame prevents the basket mesh from "becoming frayed" and hence causing injury to the user and damage to the sterilization packaging.

Our double frame therefore ensures maximum safety and a long service life.

Minimal contact surface as a result of the special design of the silicone mounts.

Sterilization Basket System

Easy handling and configuration

System view with sterilization basket, high – Standard (8584.1202) and sterilization basket, high – long (8584.1302)

System view with sterilization basket, low – Standard (8584.1212) and sterilization basket, low – long (8584.1312)

The silicone holders (blue) are based on the instrument diameter and should be ordered separately.
